3) Returned with compliments,

The stock taking of types in lump once in 5 years may be approved as proposed by the Superintendent. But the latter may be asked if if it is not practicable to take stock of English imported types separately. It is very desirable to do so since the types imported from foreign countries are understood to be about four times as costly as those of local manufacture.

GENERAL SECRETARY.
14 APR. 193
No

SIR,

With reference to G. O. NO: G. 1323-5/G.P. 14-09-7, dated 27th August 1910, regarding the periodical stock-taking of plant and stores of the Government Press, I have the honour to submit herewith a statement showing the results of stock-taking for the five years ending 30th June 1931.

The condition of the machinery and plant of the press has been certified to by the Inspector of Boilers in Mysore, who was deputed for the purpose by the Chief Engineer - Mysore Bangalore, and the list of plant and machinery containing his remarks is submitted herewith for the information of Government.

The stock-taking of type in lump instead of individually for each kind and size was adopted this time as sanctioned in G. O. No: G. 11766-7/P.&.S. 50-26-20, dated the 21st March 1929. This procedure is found to be more simple, yet convenient and effective when compared with the system of stock-taking of each individual kind of type. This system is in vogue in the Government of India Presses also as submitted in this office letter No: P. 788, dated 11-9-1928, and it may therefore be kindly ordered to be followed at the time of quinquennial stock-taking in future years also.

I have the honour to be,
Sir,
Your most obedient servant,

B. Puttaiya
Superintendent,
Government Printing.

Bangalore.

To

GENERAL SECRETARY
10 JUNE 1932
No.

R. Ranga Rao, Esq., B.A., B.L.,
Secretary to Government, General Department,
BANGALORE.

SIR,

With reference to your letter NO: G. [illegible]S. 52-34, dated the 30th ultimo, enquiring whether it is not practicable and also desirable to take stock of English imported types separately as they are more costly than those of local manufacture, I have the honour to state that the English types in use in the Government press were almost all bought in 1905-6-7 when Mr. Yates was appointed Superintendent of the press, and they have all worked out to almost nil in book value by yearly depreciation. These are not added to now by fresh purchases except in very small quantities for replenishing exhausted letters. They are all much worn and battered. The types required for the use of the Government press are all now being cast in the press itself. There is therefore no fear of valuable type being mixed up with cheap type in taking stock of type as all stock in the Press is practically of the same value, being almost cast in the Press itself.

I have the honour to be,
Sir,
Your most obedient servant,

B Puttaiya

Superintendent,
Government Printing.

B Shivaiya
Superintendent,
Govt. Printing,
12/4/32 Bangalore

Certified that I have inspected the machines entered in this list and that they are in good working condition. The valuation is correct. Marginal remarks have been made wherever necessary. Many of the machinery, though old, have been kept in very good order and have not necessitated any repairs so far.

(Signed) V. Ganesh Iyer.
Inspector of Boilers
